

## Programmable DC Power Supply

## PROGRAMMABLE DC POWER SUPPLY MODEL 62000H SERIES

Chroma's new 62000H Series of programmable DC power supplies offer many unique advantages for telecom, automated test system & integration, industrial, battery charge & simulation for hybrid cars and solar panel simulation. These advantages include high power density of 15KW in 3U, precision readback of output current and voltage, output trigger signals as well as the ability to create complex DC transient waveforms to test device behavior for spikes, drops, and other voltage deviations.

The 62000H Series includes 14 different models ranging from 5KW to 15KW, with current range up to 375A and voltage range up to 1000V. The 62000H can easily parallel up to ten units capable of 150KW with current sharing for bulk power applications, for example, battery bank simulation of 450V/150A/67.5KW for electric vehicle and military use.

There are 100 user programmable input status on the front panel for automated test application and life cycle ON/OFF test. In addition, the 62000H has a 16 bit digital control with bright vacuum fluorescent display readout.

The 62000H series DC power supplies are very easy to operate either from the front panel keypad or from the remote controller via USB / RS232 / RS485 / APG (Standard) and GPIB & Ethernet (optional). Its compact size with 3U only can be stacked on a bench in a standard rack without any difficulty.

Another unique capability of the 62000H supplies is their ability to create complex DC transient waveforms. This capability allows devices to be tested to DC voltage dropouts, spikes and other voltage variations making them an ideal choice for aerospace device testing, inverter testing and other devices which will experience voltage interrupts. Applications include DC/DC Converter & Inverter voltage drop test, engine start-up simulation, battery automated charging, electronic product life cycle test, etc.

## MODEL 62000H SERIES

### Key Features :

- Power range : 5KW / 10KW / 15KW
- Voltage range : 0 ~ 1000V
- Current range : 0 ~ 375A
- High power density (15KW in 3U)
- Easy Master / slave parallel & series operation up to 150KW
- Precision V&I measurements
- High-speed programming
- Voltage & current slew rate control
- Digital encoder knobs, keypad and function keys
- Current sharing operation
- Voltage ramp function (time range: 10 ms ~ 99 hours)
- Auto sequencing programming: 10 programs / 100 sequences
- OVP, current limit, thermal protection
- Standard analog programming interface
- Standard USB / RS232 / RS485 interface
- Optional GPIB / Ethernet interface
- Remote output ON / OFF (I / P)
- Remote sense line drop compensation
- LabView and Labwindows
- Solar array simulation function
- Shade I-V curve simulation
- I-V curve programming: 10 program / 100 I-V files
- CE Certified

**Chroma**

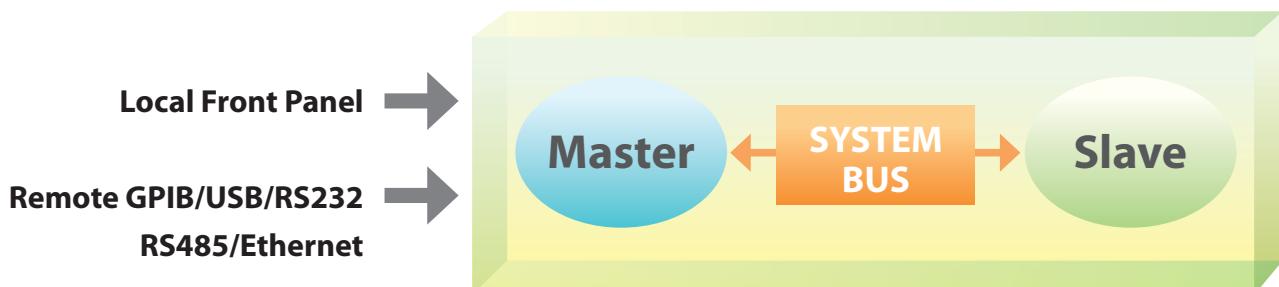

## HIGH POWER DENSITY 15KW IN 3U PROGRAMMABLE DC POWER SUPPLY

The 62000H Series supplies offer a high power density envelop of maximum 15kW in 3U, deliver low output noise and ripple, excellent line and load regulation, and fast transient response. With wide range of voltage (30V~1000V), current (375A~25A) combinations, suitable for every part of your manufacturing process from design to production testing.

## MASTER / SLAVE PARALLEL & SERIES OPERATION UP TO 150KW

When high power is required, it is common to connect two or more power supplies in parallel or series. The 62000H Series supplies have a smart Master / Slave control mode making series/parallel operation fast and simple. In this mode, the master scales values and downloads data to slave units so programming is simple and current sharing automatic.

## SOLAR ARRAY SIMULATION FUNCTION

Model 62150H-600S/1000S provides an unique feature to simulate the output characteristics of a solar array. This function is useful for MPPT performance evaluation on PV inverter device. User can easily edit the I-V curve, testing and monitor the PV inverter via softpanel , see the right Figure A & B.

\* Please see the solar array simulator brochure for more informations.

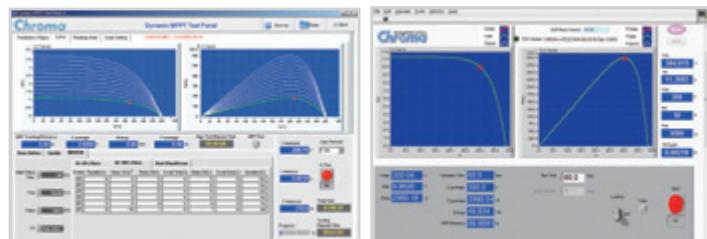

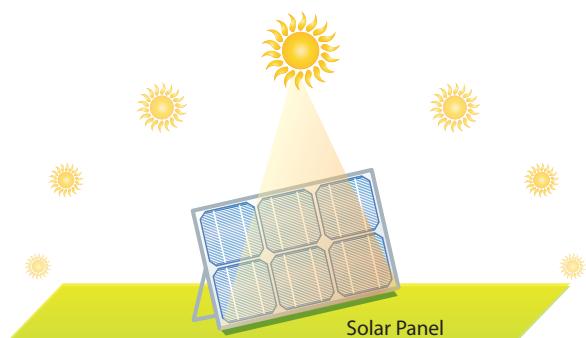

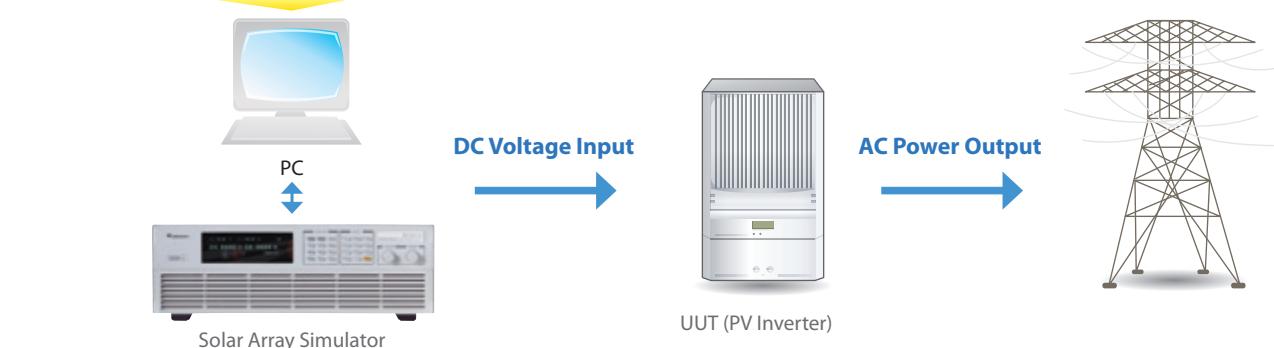

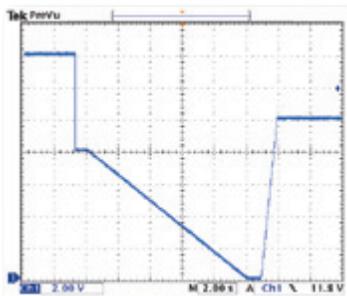

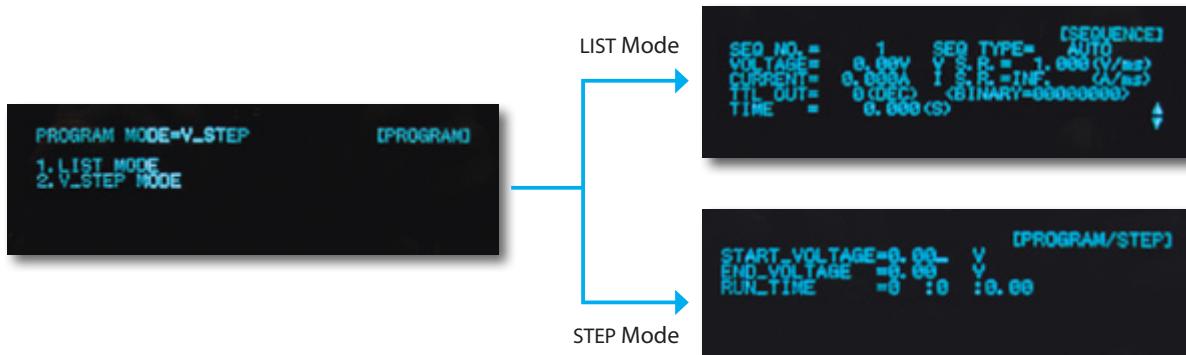

Figure A : Dynamic MPPT Test

Figure B : Static MPPT Test

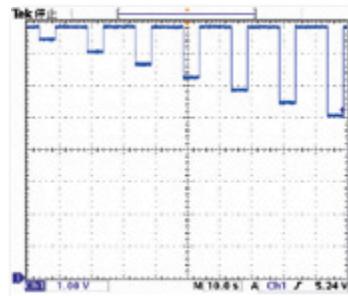

## PROGRAMMING SEQUENCES APPLICATIONS

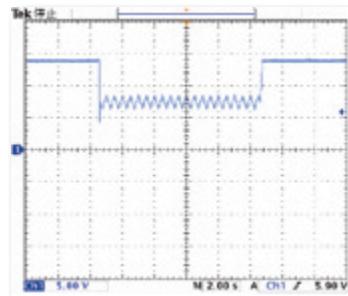

The 62000H Series supplies' LIST and STEP modes allows for auto sequencing function. The LIST mode allows for 100 user programmable sequences with time settings ranging from 5ms to 15000s and voltage / current slew rate control. The STEP mode allows for setting start, end voltage and run time of 10ms to 99 hours for automated test applications. Applications include DC/DC Converter & Inverter voltage dropout testing, engine start-up simulation, battery automated charging, battery voltage dropout simulation, product life cycle testing and avionics testing.

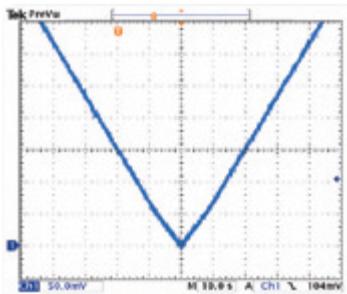

Battery Voltage Dropout

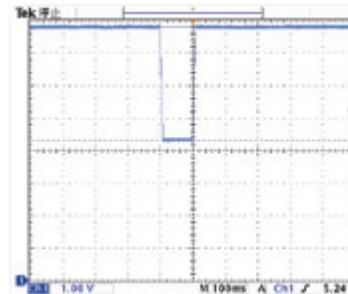

Reset Behavior at Voltage Drop  
of ISO 16750-2

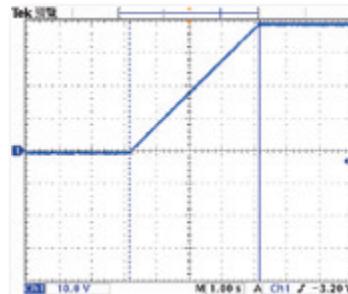

Engine Starting Profile  
of ISO 16750-2

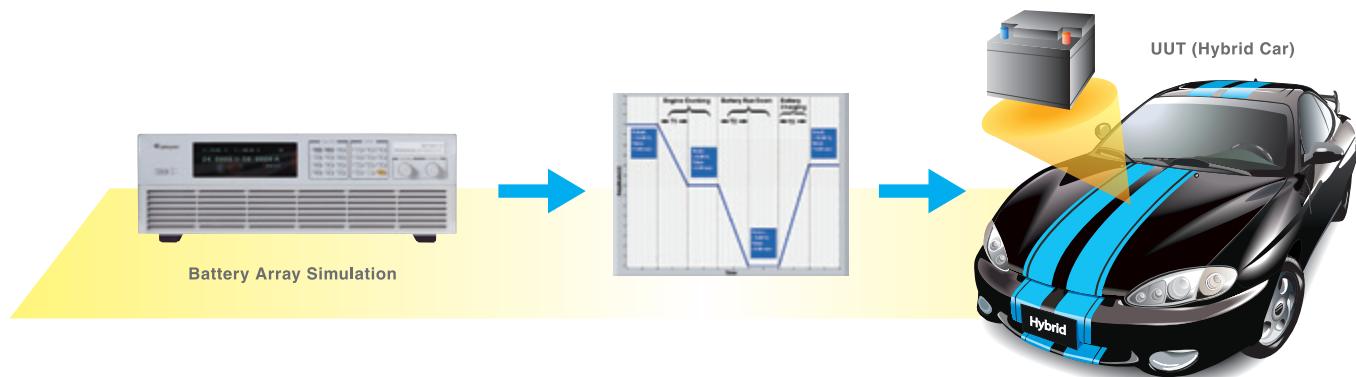

Battery Voltage Slow  
Decrease & Decrease

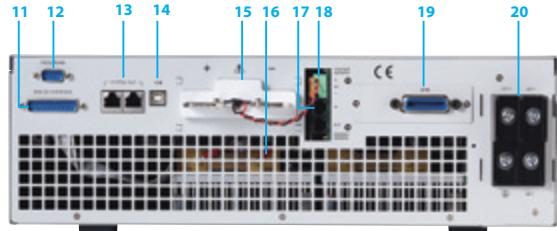

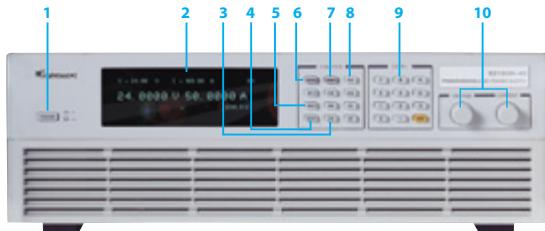

Telecom Converter Sag Testing

Output Voltage Slew Rate Control

## PANEL DESCRIPTION

### 1. POWER Switch

### 2. VFD Display

Display setting, readings and operating status

### 3. LOCK Key

Lock all settings

### 4. OUTPUT Key

Enable or disable the output

### 5. CONFIG Key

Set the system configuration

### 6. VOLTAGE Key

Set the output voltage

### 7. CURRENT Key

Set the output current

### 8. PROG Key

Program the sequence

### 9. NUMERIC Key

Set the data

### 10. ROTARY Key

Adjust the V&I and set the parameter

### 11. Analog programming interface

For analog level to program and monitor output voltage & current

### 12. RS-232 or RS-485 Interface (alternative)

### 13. System Bus

For master/slave parallel and series control

### 14. USB Interface

### 15. OUTPUT Terminal

Connect the output cable to a UUT

### 16. System Fan

With fan speed control

### 17. Current Sharing Terminal

Connect the cable to slave unit

### 18. Sense Terminal

Connect the UUT for voltage compensation

### 19. GPIB or ETHERNET Interface (optional)

### 20. AC Input Terminal

## ORDERING INFORMATION

Power Rating	62000H Series Programmable DC Power Supply
<b>2KW</b>	62020H-150S : Programmable DC Power Supply 150V/40A/2KW with Solar Array Simulation 62050H-40 : Programmable DC Power Supply 40V/125A/5KW
